ZERO-SORT® RECYCLING
a casella service

# How Recycling Gets Done™

Zero-Sort is the single bin recycling service that puts more of your stuff back into the world and less of it into the landfill.

**It never leaves our sight:** Our state-of-the-art sorting facilities are located throughout the Northeast. From pickup to final processing, we make sure your recyclables take the shortest possible route from the bin to the shelves.

**It's just one bin:** No sorting on your end makes it easier to recycle more stuff more often. You just focus on filling the bin – we take care of the rest.

**It's what we do:** To us, green is much more than an empty promise or marketing tactic. It's our livelihood. And it's why we gear everything we do toward real, measurable results.

## How the Zero-Sort Machine Works

**1.** Material enters the first screen that breaks and removes **glass** bottles and jars.

**2.** Rotating discs push **cardboard** over the top while smaller material falls below.

**3.** Smaller disc screens separate **paper**.

**4.** An eddy current creates a reverse magnetic field that repels **aluminum** cans.

**5.** A magnet picks out **tin** cans.

**6.** Optical sorting technology sorts **plastics** into their different types.
