

Pittsford's Swimming Pool-Filling Policy

The Town of Pittsford is able to accommodate property-owner/water customer requests for bulk water purchases from its fire hydrants for the filling of swimming pools (where such pools lie within 300 feet of a hydrant) with water from non-sanitized, non-disinfected fire hydrants. Such water is only intended for use within a swimming pool and is not intended or appropriate for human consumption.

The rate structure is follows:

REGULAR WATER DELIVERY

A \$50.00 site visitation charge, which includes the Water Superintendent's time to connect/disconnect hoses and to turn water on and off.

A flat charge for the following three amounts of volume:

\$175.00 for pools of up to 10,000 gallons capacity

\$300.00 for pools of 10,001 to 20,000 gallons capacity

\$400.00 for pools of more than 20,001 gallons capacity

All payment is to be made immediately upon delivery of the requested water, by check payable to the Town of Pittsford given over to the Water Superintendent or by cash or check paid over to the Town Treasurer. Failure to pay shall result in the loss of future bulk water purchase privileges and the immediate application of penalties and interest and subjection of such residential water customer to a water shut-off order by the Town.

FIREFIGHTER WATER DELIVERY

For those residents currently serving in the Pittsford Fire Department, water from the Town's water supply may be purchased to fill swimming pools, with delivery made by the Fire Department in tanker trucks at the rate of \$30.00 per 1,500 gallon tanker load. There is no site visitation charge.

All fees generated by the filling of swimming pools will be deposited into the Water Fund's Capital Reserve Account.

The rate structure is subject to change by order of the Pittsford Water & Sewer Commission.

Effective: 7/26/2011
